ABRASIVE PAINTING

Ingredients:

- Paint: Exterior Latex (choose a color to match the bark)
- Mason Sand: 30 mil - 70 mil

Formula

- Mix 5 oz sand per quart of paint
- Mix in small batches, or press sand on by hand after painting.

"If trapping out beavers ranked among our earliest crimes against nature, bringing them back is a way to pay reparations. Beavers, the animal that doubles as an ecosystem, are ecological and knives, capable, in the right circumstances, of tackling just about any landscape-scale problem you might confront. Trying to mitigate floods or improve water quality? There's a beaver for that. Hoping to capture more water for agriculture in the ver. Concerned about sedimentation, salmon runs, wildfire? Take two families of beaver and check back in a year."

Ben Goldfarb *Eager: The secret and surprising lives of beavers and why they matter.*
