

**Have you solved the puzzle?**

BEAVERS create wetlands that become homes for many other species. Beavers also create places where other species can eat, drink, fish, hunt, nest, lay eggs, and raise families. Young animals use beaver ponds as training grounds to practice new skills safely.

**When we protect BEAVERS, we also help all the wildlife who depend on BEAVERS.**

**This is why beavers are called a Keystone species.**

Start at Booth #1 and visit all booths with a puzzle icon on the map to collect your puzzle pieces.
